BlackBerry Cybersecurity Consulting:

Global Cybersecurity Consultancy

The Challenge

In the face of an increasingly complex cybersecurity threat landscape, BlackBerry Cybersecurity Consulting works to analyze, size and mitigate the risks particular to your organization.

The Solution

Successful businesses are built on trust. Trust in products and services, trust in and among your employees, and trust by customers in your brand. Cyber-attacks take advantage of this trust to access and disrupt your business. To protect the trust in your organization, you need a security partner that can help you respond, identify, and prepare for ongoing cybersecurity threats.

BlackBerry Cybersecurity Consulting has the deep expertise with decades of security research and development, to help you protect your users, products and company data. Traditional security consultants test to find holes, and then go home just as the real work begins. BlackBerry will be there to help you navigate a growing range of threats to products, growth, and corporate data. BlackBerry Cybersecurity Consulting will support your organization from product development to network management.

Global Leader in Security

The world's leading organizations as well as national government agencies rely on BlackBerry products and services to secure their mission critical operations. BlackBerry has the in-depth knowledge and investigative experience to help organizations identify and mitigate today's increasingly sophisticated threats. In verticals prone to attack, such as Banking, Insurance, Healthcare, and Transportation, BlackBerry security teams provide the expertise and guidance to defeat persistent, well-funded attacks. Our customers include 100% of the F100 Commercial Banks, 10 of the 10 largest law firms, and 16 of the G20 governments.

An Individualized Approach

The world's leading organizations as well as national government agencies rely on BlackBerry products and services to secure their mission critical operations. BlackBerry has the in-depth knowledge and investigative experience to help organizations identify and mitigate today's increasingly sophisticated threats. In verticals prone to attack, such as Banking, Insurance, Healthcare, and Transportation, BlackBerry security teams provide the expertise and guidance to defeat persistent, well-funded attacks. CHECK IT Health Check Service

Bundesamt für Sicherheit in der Informationstechnik

CIS ISO 9001:2008 REGISTERED FIRM

Security Assessments
Penetration testing services carried out to recognized standards including NCSC CHECK and OSSTMM. Our highly accredited consultants will assess vulnerabilities in any infrastructure, device or configuration, including SCADA and CNI. We also provide physical security assessments including social engineering.

Event Handling/Response
Our SIEM Team will enhance and implement incident monitoring and response capabilities and support imbedding efficient and robust processes to minimize the impact of any breach.

Digital Forensic Services
Investigation and Analysis for both internal and legal proceedings as well as data recovery and media analysis. We can deploy First Responders quickly to secure Chain of Evidence working to ACPO guidelines

Training & Certification
Providing internal and on-premise security courses covering general staff security awareness and social engineering as well as enhancing internal skillsets through Secure Code Development and our recognized QSTM Pen Tester qualification.

Governance, Risk and Compliance
With in-depth knowledge in the regulated market space our consultants can guide and support accreditation for numerous certifications including PSN, ISO27001, GDPR, PCI DSS and beyond.

Security Strategy
Leverage our extensive knowledge, research and development of security products and practices to help build the right cyber defense for your business and processes.

Threat Intelligence
Extended assessment that will consider the real life threats to any organization based on industry and strategy and consider what threat actors present the greatest risk, including management of 3rd party ecosystem.

Secure Engineering/Design
Whether looking to build a secure platform or deploy an effective IoT capability, our specialist security engineers can advise on secure architecture design, deployment and supply chain management.

About BlackBerry

BlackBerry is securing a connected world, delivering innovative solutions across the entire mobile ecosystem and beyond. We secure the world's most sensitive data across all end points – from cars to smartphones – making the mobile-first enterprise vision a reality. BlackBerry is a GDPR compliant, ISO22301 & ISO27001 certified company.

Founded in 1984 and based in Waterloo, Ontario, BlackBerry operates offices in North America, Europe, Middle East and Africa, Asia Pacific and Latin America. The company trades under the ticker symbols "BB" on the Toronto Stock Exchange and "BB" on the New York Stock Exchange.
